EDUCATION

University of Kansas
Lawrence KS.
B.F.A Industrial Design 2007

EXPERIENCE

UI/UX Designer

Integrated Computer Solutions ICS, Bedford, MA
October 2012 - Present

Responsible for creating wireframes and visual designs for mobile and embedded software. This was a hybrid role where I would design software experiences and produce the visual designs using Adobe Creative Suite. Working in a collaborative team allows me to bounce ideas off of other members in order to enhance an experience and produce more meaningful design.

Industrial Designer

Marine Technologies International Inc., Plympton, MA
February 2008 - October 2012

UL & US Coast Guard Approved Life Jackets

Responsible for research, development, and design of all branded goods from start to finish. Selecting which models to design for a given year throughout multiple price points and categories, creating presentations to explain design direction for a product line, responsible for all concepts, technical packages, sourcing materials, traveling throughout Asia to guide our technical departments in order to achieve design objectives. Working throughout the design process to lower cost and increase manufacturing efficiency on given products. Accountable for all product ancillaries such as packaging design, graphic design, trade show booth design, and marketing. Having a flair for sales I traveled to trade shows and retail stores to discuss sales, products, and needs of customers.
